PROJECTS

Choto Job

E-Governance Web Platform | Job Matching System

10/2026 – 12/2026

Designed and developed an e-governance platform to connect local citizens with daily-wage workers for short-term tasks. The system supports structured user registration, verification, job posting, and application workflows to ensure transparency and reliability within the community.

Kala Ghar

Web Application | Handicraft Learning Platform

03/2025 – 05/2025

Developed a web-based platform designed to connect handicraft teachers and learners. The project focused on providing a user-friendly interface and structured content sharing to support learning and promote traditional skills through digital means.

Sajilo Wear

Full-Stack Web Application | Clothing Rental & Marketplace

11/2025 – 12/2025

Developed a full-stack web application enabling users to buy, sell, and rent traditional clothing through a digital marketplace. The platform includes user authentication, profile management, and listing dashboards, focusing on usability and smooth interaction between frontend and backend components.
